Professional Summary

AI Engineer Enthusiast with practical experience in Python, machine learning workflows, and data preprocessing. Skilled in building small ML models, implementing CNN-based image classifiers, and creating automation pipelines using tools like n8n. Passionate about applying AI techniques to real-world problems and continuously improving through hands-on learning and experimentation.

Education

Mehran University of Engineering and Technology (MUET) 2021 – 2025
Bachelor of Engineering (B.E.) in Software Engineering (CGPA: 3.4/4.0)

Experience

Backend Developer Aug 2023 – Feb 2024
AGRICLIK Startup

- Supported backend development tasks using Python under senior supervision.
- Assisted in testing, debugging, and documenting internal system workflows.

Projects

Heart Disease Prediction — Python, Scikit-learn

- Built a classification model using Logistic Regression.
- Performed data cleaning and evaluation achieving strong accuracy.

Customer Segmentation — Python, Scikit-learn

- Applied K-Means clustering to identify customer groups.

Basic Image Classifier — TensorFlow

- Trained a simple CNN using TensorFlow to classify images into multiple categories.

Client Info Enhancer Automation — n8n

- Built an automation workflow to clean, structure, and forward client data.

AI Consultation Form Processor — n8n

- Automated form submissions to Google Sheets and email notifications.

Skills

- **Technical Skills:** Python, SQL, Scikit-learn, TensorFlow, PyTorch, Flask, Pandas, NumPy, Matplotlib, Seaborn, Basic NLP, CNNs, n8n Automation, API Integration, Git, GitHub
- **Soft Skills:** Problem-Solving, Team Collaboration, Communication, Adaptability

Certifications

- Data Science & AI Mentorship — Codanics
- Crash Course on Python — Google (Coursera)
- Data Science Bootcamp — IEEE MUET
- NFTP Technical Certification

Activities

- Technical Coordinator — AWS Cloud Club MUET
- Vice Captain — Green Youth Movement Club MUET
