PERSONAL STATEMENT

A Full-Stack Web Developer and Computer Science graduate with hands-on experience in building scalable, secure, and data-driven web applications. Proficient in PHP (Laravel), Python, RESTful APIs, MySQL, and MongoDB, with strong expertise in backend architecture, role-based access control, and database optimization. Experienced in integrating AI concepts into real-world systems and delivering production-ready enterprise solutions. Passionate about clean code, system performance, and modern web technologies.

WORK EXPERIENCE

2025 (Nov – today)

Construction Management System (Laravel, MySQL)

- Designed and developed a full-stack construction management system using Laravel
- Implemented role-based authentication (Admin, Staff, Manager)
- Developed modules for projects, expenses, salaries, inventory, and reports
- Optimized database queries and relationships for large datasets
- Integrated REST APIs for system communication

2024 (May -Dec)

Alumni Management System (Laravel, MySQL)

- Built a role-based alumni portal for students, administrators, and recruiters
- Implemented authentication, authorization, and CRUD operations
- Designed relational database schema and migrations
- Developed dashboards and reporting features

July(2023) – Jan(2024)

Qr_Code Based Navigation System using (python & kivy, kivyMD)

- Developed a QR-code-based indoor navigation system using Python
- Implemented real-time location mapping and UI using KivyMD
- Applied AI-based logic for efficient route guidance
- Focused on usability and performance optimization.

EDUCATION AND TRAINING
2021 – 2024

BS. Computer Science

University of Sindh Jamshoro

TECHNICAL SKILLS

- Programming Languages:**
Python, C, PHP Core, PHP (Laravel)

- **Web Technologies:**
PHP Framework, REST APIs, HTML, CSS, Bootstrap Java-Script, Ajax, jQuery
- **Database Systems:**
MySQL, SQL Server, MongoDB
- **Development Tools:**
Visual Studio, VS Code, Jupyter Notebook
- **Other Skills:**
AI & Machine Learning Concepts, Role-Based Access Systems, Database Optimization

CERTIFICATIONS

APRIL - AUG 2022

1. CIT (web development) course under NAVTTC programme.

OCT -NOV 2025

2. Generative-AI Application Developer Certificate Under NCEAC-HEC Generative AI Training.

KEY STRENGTHS

- Backend Architecture & API Design
- Secure Web Applications
- AI-Integrated Systems
- Problem Solving & Optimization

CAREER OBJECTIVE

To secure a Full Stack Developer position in a growth-oriented organization where I can contribute to the design and development of scalable, secure, and enterprise-grade web applications using modern backend frameworks and database technologies. Aiming to apply strong expertise in Laravel, RESTful API development, system architecture, and relational database optimization to deliver high-performance solutions aligned with business objectives and industry best practices.
