Johar Mor, Harmain Tower, block 4 , 1st Floor , flat 13 , Karachi

OBJECTIVE

I am a passionate Frontend Developer who loves turning creative ideas into interactive and engaging web experiences. With expertise in ReactJS, NextJS, JavaScript (ES6+), Bootstrap, Tailwind CSS, Framer Motion, and GSAP, I enjoy building modern, responsive, and visually dynamic websites. Im always eager to learn new tools and improve my skills to stay aligned with the latest industry trends. For me, frontend development is not just coding—it's about creating smooth user experiences that leave a lasting impression.

EXPERIENCE

• HIDAYA TRUST

WordPress Intern

jun 2025 - Aug 2025

Jamshoro, Sindh

- Designed and customized WordPress websites using Elementor and custom themes.
- Installed, configured, and optimized plugins for better site performance.

* Grade: 80

March 2018

Umerkot, Pakistan

PROJECTS

◦

PopCornplay: [Movie Website]

Tools: React.js, JavaScript, Nodejs, MongoDB, Tailwindcss

- * Developed a dynamic movie browsing website using ReactJS and TailwindCSS with a fully responsive UI.
- * Managed global state using Context API for movies, favorites, and watchlist functionality.
- * Integrated external Movie APIs for fetching, searching, and displaying real-time movie data.
- * Optimized component reusability and code structure for better maintainability and scalability.
- * Implemented reusable components and API error handling for better performance and UX.
- * Added movie detail pages with trailers, ratings, and descriptions for an engaging interface.

◦

Al-Shahbaz Mini-Mart: [E-Commerce Website]

Tools: Reactjs, MongoDB, Mongoose, Node.js

- * Used Redux Toolkit for global state management of products, cart, and user data.
- * Integrated custom REST API for dynamic product listings and real-time updates.
- * Implemented Add to Cart, Remove from Cart, and Checkout functionalities with live calculations.
- * Added search, filter, and category features for a smooth shopping experience.

◦

Gemini Clone: [AI Chat Application]

Tools: React.js, tailwindcss, React-Query

- * Developed an interactive AI chat application inspired by Google Gemini using ReactJS and TailwindCSS
- * Integrated Google Gemini API / AI model to handle user prompts and generate intelligent responses.
- * Implemented Context API for managing chat history, user sessions, and global state.
- * Designed a clean, responsive, and modern UI with smooth animations and real-time message updates.
- * Added features like new chat creation, clear history, and scrollable chat interface for better UX.

◦

NoteSphere – Smart Notes Organizer

Tools: *React.js, Node.js, Express.js, MongoDB, TypeScript, Tailwindcss*

- * Developed a responsive note-taking application using ReactJS and TailwindCSS for a clean, user-friendly interface.
- * Implemented Context API to manage global state for notes, including add, edit, and delete functionality.
- * Enabled real-time note saving with local storage support to preserve user data across sessions.
- * Designed reusable components and interactive UI elements for smooth user experience.
- * Added features like search notes, categorize, and clear all notes for better organization.

SKILLS

- **Programming Languages:** JavaScript (ES6+), TypeScript, Reactjs, Nextjs, MongoDB, MySQL, PHP ,Node JS
- **Web Technologies:** HTML 5, CSS3, Tailwindcss, Bootstrap 4, Styled-components, Material UI
- **Database Systems:** MongoDB, SQL
- **Cloud Technologies:** Firebase
- **DevOps & Version Control:** Git, GitHub, Docker, Webpack
- **Specialized Area:** Frontend Development, Responsive Design, API Integration
