Experience

asancars

June 2026 – July 2026

Flutter Developer Intern

On-Site

- Built real-time, WebSocket-driven ride-matching features for a ride-hailing app spanning separate passenger and driver Flutter apps, backed by a Laravel/Reverb WebSocket service and a plain-PHP REST API.
- Developed both user-side and driver-side apps using GetX, handling REST catch-up on login, live WebSocket subscription, offer acceptance, and optional counter-offers.
- Deployed and debugged the Laravel/Reverb backend on an AWS EC2 VPS end-to-end: configured Apache reverse proxy.
- Diagnosed and fixed production issues.

Mustaza

March 2025 – June 2025

Flutter Developer Intern

Remote

- Completed a 1-week trial period, delivering beginner-friendly tasks to demonstrate core Flutter skills.
- Contributed to real-world apps including a file reader app, an intermittent fasting tracker, and an accounting/ERP system supporting invoice management and financial tracking.
- Gained hands-on experience with state management, REST APIs, debugging, and UI/UX design across diverse app use cases.

Personal Projects

Learnify – STEM App | *Flutter, Firebase*

Jan 2025 – Present

- Building an application to facilitate STEM education for school children as part of semester coursework addressing real-world humanitarian goals.
- Integrated Firebase authentication, databases, and notifications behind an intuitive user interface.

Intermittent Fasting Tracker | *Flutter, SQLite, Provider*

March 2025 – April 2025

- Took the lead development role on an app to help users manage fasting schedules, water intake, and goals, with local storage via SQLite.
- Used Provider for scalable state management and integrated the Gemini chatbot API for personalized fasting tips.

Fintech Banking App | *Native Android, SQLite*

April 2024 – May 2024

- Developed a fintech bank app prototype using Native Android and SQLite, building a foundation in relational databases, fragments, and layouts.

Education

Mehran University of Engineering and Technology

Dec 2022 – Nov 2026

BE in Software Engineering, Cum. GPA: 3.77 / 4.0

Jamshoro, Pakistan

Skills

Languages: Dart, Kotlin, Java, C++, PHP

Frameworks & Tools: Flutter, GetX, Provider, Android SDK, Laravel, Laravel Reverb (WebSockets), Firebase, SQLite, REST APIs, Supabase

Infrastructure: AWS EC2, Apache, Git/GitHub

Coursework: Artificial Intelligence, Data Structures and Algorithms, Object Oriented Programming, Computer Networks, Software Requirements Engineering, Database Systems

Societies

Software Engineering Society, Mehran University | Leader, AWS Student Builder Group – Mehran University Chapter | Google Developers Student Club, Mehran UET | Microsoft Learn Student Ambassador
